SKILLS

Languages

JavaScript, TypeScript

Frontend

React, Next.js, HTML5, CSS3, Tailwind CSS

Backend

Node.js, REST APIs, JWT Auth, WebRTC (LiveKit)

Databases

MySQL, PostgreSQL, Prisma, Supabase

Testing & Security

Apache JMeter, Snyk

Tools

Git, GitHub, VS Code, Clerk

STRENGTHS

- Project coordination
- Team collaboration
- Stakeholder engagement
- Technical documentation
- Problem solving
- User support

EDUCATION

BSc. Computer Science
KNUST

September 2025

WASSCE, General Science
Adisadel College
June 2021

SUMMARY

Computer Science graduate with hands-on experience developing web applications, educational technology platforms, and management systems. Skilled across the modern JavaScript/TypeScript ecosystem with React, Next.js, and Node.js, plus working knowledge of performance testing (JMeter) and security vulnerability assessment (Snyk). Comfortable owning features end to end from architecture through delivery in both team and independent settings, with a particular interest in EdTech and community-impact products.

EXPERIENCE

Software Development Intern At A Start-up

Sep 2024 – Jan 2025

WidePlus, Accra, Ghana

- Assisted in developing, testing, and maintaining software solutions.
- Participated in debugging and issue resolution activities.
- Collaborated with development teams to improve software quality and functionality.
- Supported implementation and maintenance of software systems.

Part-Time Teacher

Jul 2021 – Dec 2023

Kwame Nkrumah Memorial School

- Taught Mathematics, Integrated Science, and Religious & Moral Education.
- Prepared lesson plans and instructional materials.
- Developed strong communication, mentoring, and stakeholder engagement skills.

PROJECTS

FHM-Meet — Full-Stack Developer (Independent Project)

- Designed and built a Zoom/Google Meet-style video conferencing web app with instant link-based meeting access.
- Implemented real-time multi-participant video/audio using WebRTC (LiveKit SFU), with mute, camera toggle, screen share, and live chat.
- Built a frictionless guest-join flow allowing invited users to enter meetings instantly via shared link without account creation.

Tech: Next.js, TypeScript, LiveKit (WebRTC), Clerk, Supabase, Prisma, Tailwind CSS

Digi-Receipt System — Full-Stack Developer (Independent Project)

- Identified that issuing physical receipts for condolence donations at funerals and similar events is costly, slow, and error-prone, and built a digital system to replace it.
- Built an usher-facing web app to record donor name, phone number, amount, and reason, generating a unique digital receipt instantly.
- Implemented downloadable PDF and plain-text receipts, plus a shared, real-time donor list with running totals and CSV export for the family's records.
- Deployed on Vercel with a hosted Postgres database so the system runs reliably from a single device with no printed receipt books required.

Tech: Next.js, TypeScript, PostgreSQL (Vercel Postgres), jsPDF

Ghana Police Service Staff Management System — Independent Project

- Built a secure, admin-only personnel management system for the Ghana Police Service Eastern North Region.

- Implemented full CRUD operations for police personnel records including search, filtering, and bulk data management.
- Integrated real-time direct messaging between administrators with text, file sharing, and voice message support.
- Developed video and audio calling features using LiveKit WebRTC infrastructure.
- Designed and deployed a role-restricted authentication system with session management and route protection.

Tech: Next.js 14, TypeScript, Prisma, PostgreSQL, Cloudinary, Pusher, LiveKit, Upstash Redis, NextAuth.js, Tailwind CSS

Lambda LMS — Full-Stack Developer (Team Project)

- Collaborated on a Learning Management System for online learning and content delivery.
- Contributed to system design, feature implementation, and platform improvements.

Tech: React, Next.js, TypeScript, Postgres, Tailwind CSS

Lambda Annotate — Independent Project

- Built a PDF annotation tool designed to integrate into an LMS as the examiner marking interface.
- Implemented freehand drawing, text annotations, sticky notes, and audio-recorded comments.
- Developed PDF export functionality that bakes all annotations into a downloadable PDF file.

Tech: Next.js, TypeScript, Fabric.js, PDF.js, pdf-lib, Zustand, Tailwind CSS

SkillSwap — Full-Stack Developer (Team Project)

- Built a peer-to-peer skill exchange platform with real-time text messaging.
- Developed audio and video communication features for virtual learning sessions.
- Participated in testing, debugging, and feature integration.

Tech: Flutter, Firebase

LEADERSHIP & VOLUNTEERING

Dormitory Overseer

Jan – Jun 2021

Hamlyn House, Adisadel College

- Coordinated student welfare and dormitory activities; facilitated conflict resolution and disciplinary processes.

Bible Society – Open the Book / Awana Club Volunteer

- Delivered bible storytelling sessions and organized faith-based games and activities to support the spiritual and character development of primary school students.
